Price: Rs. 150 Book:Linear Programming Author:J.G. Chakraborty & P. R. Ghosh Publisher:Moulik Library Language:English ON Group similar results Feedback Hard Cover. Condition: Very Good. Dust Jacket Condition: Very Good. First Edition. Set of 2 vols. Size: 16 x 24 Cm. Hardcover. Condition: New. Dust Jacket Condition: New. First Edition. Contents: 1. Introduction. 2. Systematic index. 3. Systematic account. 4. Summary. 5. Acknowledgement. 6. Dedication. 7. References. From the introduction: Digenetic trematodes are believed to be originated from the turbellarian ancestors and their parasitic life is assumed to have developed from their ancestors to the phylogenetically related invertebrate hosts. The most primitive digenea, therefore, most have confined their parasitism theoretically to invertebrate hosts until the advent of vertebrates, in the simplest life cycle pattern, i.e. one host cycle. As a matter of fact this simplest pattern is represented by pathogenesis. Printed Pages: 36. Hardbound. Condition: As New. New. Contents Foreword. Editorial note. 1. Nyaya Theory of Linguistic Communication/V.N. Jha. 2. Akanksa the Nyaya view and its criticism by Vyasatirtha/D. Prahlada Char. 3. Knowledge of identity an Indian perspective/Sukharanjan Saha. 4. Knowledge from trusted tellings and its preventers/Arindam Chakraborty. 5. Some alternative definitions of Sabdapramana/Prabal Kumar Sen. 6. Eternality of word meaning relation vis a vis contextuality the Bhartrharian perspective/Tandra Patnaik. 7. Independence of Sabdapramana (Testimony as autonomous source of knowledge)/R.I. Ingalalli. 8. Prasamsita Vakya/Ratna Dutta Sharma. 9. Scope and limits of Sruti as a Pramana perspectives from Purva Mimamsa and Advaita Vedanta/G. Mishra. 10. The genesis of a verbal cognition and the temporal sequence of its antecedents/Gangadhar Kar. 11. The Advaita Theory of Sabdaparoksatva is it Testimonial or Perceptual/Raghunath Ghosh. 12. Concept of Sphota in Bhartrhari/Jyotish Ch. Basak. 13. Apta some sceptical questions/Bhaswati Bhattacharya Chakrabarti. Index. List of contributors. The present book highlights the importance of verbal testimony (sabdapramana's) in Indian Epistemology knowledge from trusted telling eternality of word and its meaning its non reducibility to inference philosophical significance of praiseworthy sentence limits of sruti as a Pramana perceptual cognition generated through verbal testimony notion of aptatva etc. These issues are freshly interpreted by a team of scholars who are engaged in research on this subject for a considerable period of time. 170 pp. Hardcover. Condition: Very Good. Hardcover in clipped dust jacket. Very good condition. University of Cambridge Department of Applied Economics, Monograph: 22. Jacket spine is sunned and jacket has some general shelf-marks to rear. Upper leading corners of boards and spine ends are a little bumped. Light edgewear to jacket in a couple of places. Pages are sound and text is clear. TA. Used. Hardcover. Condition: New. The title of the book Biotechnology in Environmental Management is truly descriptive of its contents. Biotechnology is very much an interdisciplinary field linking different branches of science: microbiology, fisheries, biochemistry, Engineering etc. Within the past four decades, there has been generous assistance from Genetics and Molecular biology. The Demand for information on this line will gradually increase as a function of Government attention and public awareness. Therefore, an understanding between experts in the various disciplines of the field is Essential for the Successful application of its basic concepts. Biotechnology in Environmental Management may serve as a reference with a comprehensive description of the. state of the art, as well as a guide to the Original literature. The chapters have been selected according to the present need, and each topic provides a comprehensive and effective understanding to satisfy wider audience from students to professionals. Efforts have-also been made to incorporate the issues ignored so far. It is specifically directed to environmentalists, microbiologists, aquaculturists, biochemists, bioengineers, chemical engineers, and food and pharmaceutical Chemists working in the industries, at universities, or at Research institutions. The issues may be of interest to policymakers and Lawyers also. The authors of individual chapters have been chosen because of their recognized expertise and their contributions to the field of biotechnology and environmental sciences. Their willingness to impart this Knowledge to their colleagues forms the basis of this book and the editors gratefully acknowledge this. Printed Pages: 715. 235 mm x 155 mm. XIII, 353 p. Hardcover. Versand aus Deutschland / We dispatch from Germany via Air Mail. Einband bestoßen, daher Mängelexemplar gestempelt, sonst sehr guter Zustand. Imperfect copy due to slightly bumped cover, apart from this in very good condition. Stamped. Stamped. Cover with bearing traces. New Economic Windows. Sprache: Englisch. Page 2 Linear Programming And Game Theory is a comprehensive guide for students studying linear programming. Summary Of The Book Linear Programming And Game Theory provides a rigorous approach towards the subject and is suitable for both experienced users and beginners. The book contains chapters and exercises that are systematically arranged. It has been written as an introduction to operations research and linear programming for students of economics and mathematics, and covers the major basic aspects of linear programming. This version contains several new illustrations and exercises on the subject; and rejects the sophisticated approach to explaining the subject. It provides a gradual and smooth transition from the conventional approach to the contemporary logical approach, laying a strong foundation for the subject with the students. The table of contents of Linear Programming And Game Theory includes chapters like Linear Programming Problems, Features Of Optimal Solutions, Mathematical Preliminaries, Simplex Method, Degeneracy, Transportation Problems, Duality, Dual Simplex Method, Assignment Problems, Geometrical Aspects of Optimal Solutions, Sensitivity Analysis, Integral Linear Programming and Game Theory. The two appendices at the end of the book are General Mathematical Programming Problems, and Some Advanced Linear Programming Topics. The book includes simple examples and provides the reader with a firm foundation on the subject. About The Authors J. G. Chakraborty is the professor of Operations Research and Mathematical Economics for postgraduate students at Calcutta University. Other books by the author are Linear Programming, Analytical Geometry And Vector Analysis and Advanced Analytic Geometry. P. R. Ghosh is a professor of Mathematics for undergraduate students at the Surendra Nath College and VidyaSagar Evening College in Kolkata. He has written other books like Higher Algebra Including Modern Algebra, Differential Equations, Advanced Analytical Dynamics, and Vector Analysis. He has also been a guest lecturer at Calcutta University, teaching Mathematical Methods to students of post-graduation there.
